Edge.

Healthcare

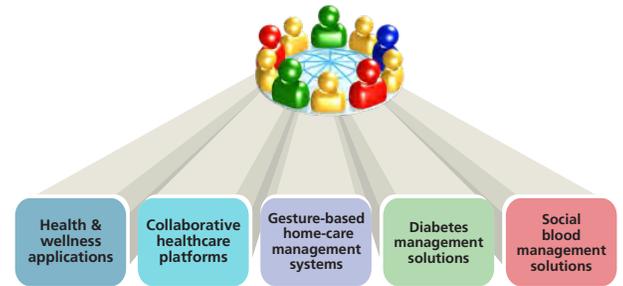

L&T Infotech's Healthcare Business Unit addresses the needs of the diverse healthcare ecosystem comprising payers, providers, device manufacturers, pharmaceutical companies and more. We leverage our domain expertise, and IT, solutions and manufacturing experience in healthcare of over 15 years to enhance value creation through innovative solutions that address the rapidly changing business needs.

L&T Infotech has demonstrated experience in servicing commercial as well as public sector payers (including Medicare, Medicaid and National Health Service) in areas of health insurance, employee benefits, disability, tele-health, electronic health records (EHR), wellness and business intelligence. Our investment in research & development has enabled us to create cutting-edge solutions in areas of preventative health, remote care management and clinical pathways.

With a rapidly changing landscape often spurred by disruptive innovation and reform, we have helped our clients deal with convergence in the industry and choose strategies to address the rampant advances in digital, mobile and remote applications. Our rich experience of working in stringent regulatory environments across geographies and an understanding of the associated business impact enables us to offer customized solutions that are fully compliant with the regulations. Over 50 organizations across North America, Europe, Africa and the Asia Pacific region have benefitted from our healthcare solutions and services. We enable organizations in the healthcare domain to enhance operational efficiency through innovative solutions in areas of claims management, policy admin systems, enterprise information management systems and transactional systems.

We leverage Big Data to provide business analytics solutions, and our approach construing empirical data from electronic health records, claims, prescription histories and other sources ally with risk assessments, social sources and device inputs.

Our solutions include:

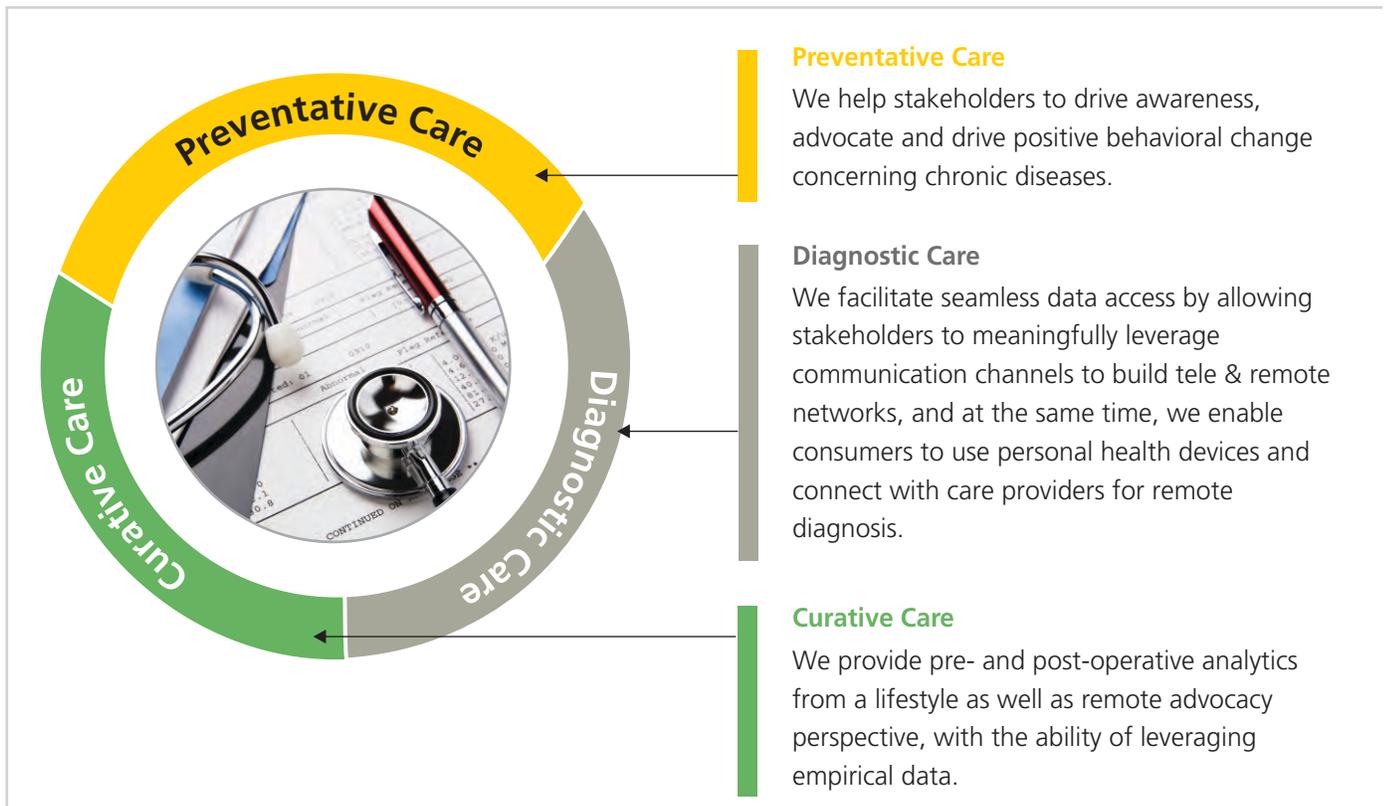

While our collaborative platforms enable seamless communication between different healthcare entities, our consumer-centric approach for certain solutions focuses on giving consumers more control over healthcare decision making.

Our technology solutions enable doctors, care providers, insurers and government funding agencies to connect better in the current digitally connected world and meaningfully address individual needs on demand and ever accurately. We help them to educate, assess and drive positive behavioral change.

Value Proposition

We derive a unique Business-to-IT Connect from our parent group's rich heritage of designing and building hospitals, providing health insurance covers and manufacturing medical equipment. Our healthcare offerings focus on preventative care, diagnostic care and curative care.

Our expertise in addressing the enterprise business needs of our clients includes developing, testing and maintaining policy administration, enterprise claim, hospital information, laboratory management, supply chain and clinical information management systems. We leverage the latest industry trends including changing communication models to provide the winning edge to our clients.
