

# Build a greener cloud with clean energy consumption practices

**Infinity Green** provides carbon footprint evaluation and recommendations on clean energy consumption to attain carbon neutrality. Leverage our cloud sustainability efficiency kit that includes essential sustainability principles and industry-aligned best practices across cloud assessment, migration, and governance to create an eco-friendly environment.

## Benefits

Industry-aligned sustainability reports

Improved carbon efficiency

Faster monitoring and measuring of cloud sustainability for a greener environment

Accelerated recommendations on smart carbon removal technologies

## Why LTIMindtree

Strong foundational legacy of dedicated ESG (Environmental, Social & Governance) practices

Decades of experience in software services and digital solutions that adopt a definitive and holistic sustainability approach

Advisory / Consulting services to realize long-term sustainability and decarbonization strategies across a wide range of industries

An emission management roadmap that encompasses ESG reporting, Net zero, and new energy frameworks for a greener IT

## Solution Details

Single pane view of carbon metrics across multi-cloud

Sustainable DevOps using smart CI/CD

Well-architected audit to maximize cloud sustainability

Ready to use templates aligned with industry-defined sustainability best practices

Recommendations on architecture and technology for optimized cloud sustainability measures

Cognitive insights to optimize resource usage, bring down costs and e-wastes

## Infinity Green - Cloud Carbon Efficiency Kit

Improve cloud carbon efficiency across multi cloud

### Assessment

Carbon emission assessment framework

- Pre-defined industry specific templates
- Pre-built data connectors

### Value Stream

Carbon emission insights

- Infinite CO2 e Calculator
- Pre-built & customizable reports

### Advisory

Recommendation & Intelligent Ops

- AI driven recommendations
- Well architected audits

Infinity Green offers simplified cloud sustainability strategies and roadmap, better visibility into carbon neutrality and recommendations to reduce carbon footprint, leading the way to a greener environment.
