

Case Study

Automation-led Data Accuracy, **Significant Cost Savings** through **Smart Well** **Factory Automation** for **US-based Energy Major**

Client

Our client is a multinational energy corporation located in the United States. They are active in many aspects of the oil and gas industries, including hydrocarbon exploration and production, refining, marketing, transportation, chemical manufacturing and sales, and power generation. They are one of the world's largest corporations and the second-largest oil company in the United States. The company's most important areas of operation include the west coast of North America, the Gulf Coast of the United States, Southeast Asia, South Korea, and Australia.

Challenges

Moving away from manual and decentralized work with quick turnaround time

01

02

Streamlining all the processes

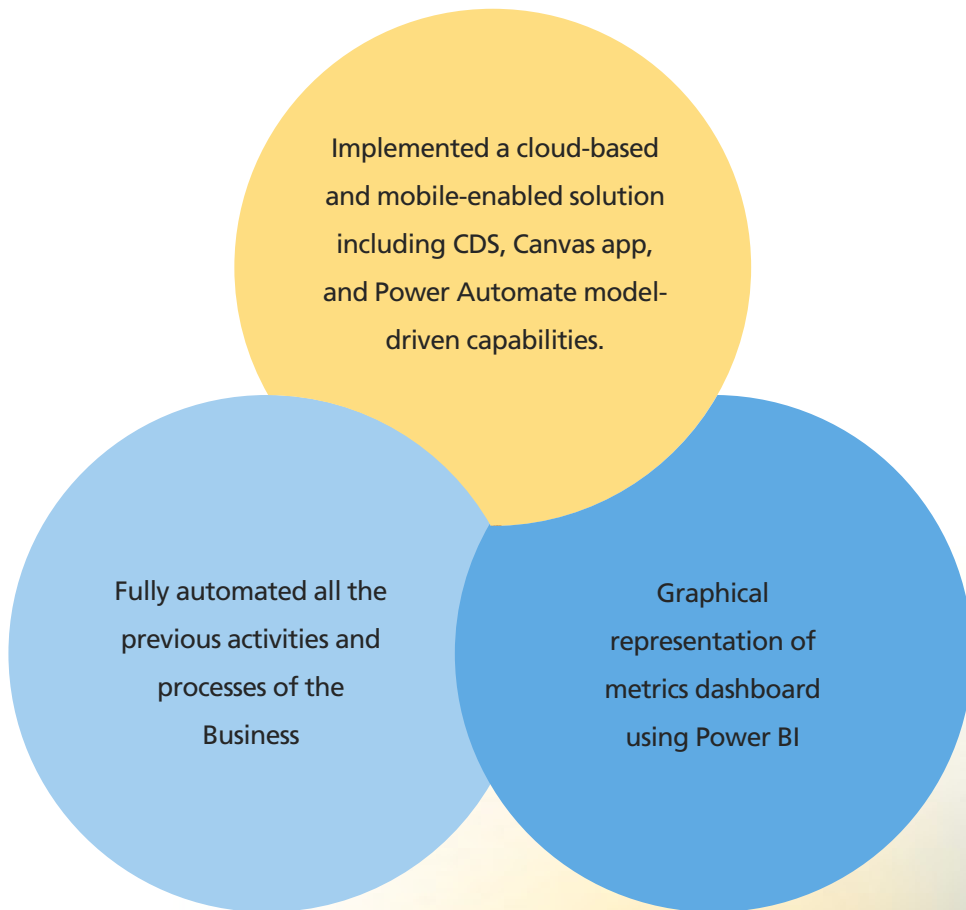

Removing all the additional costs incurred by the Regulatory bodies due to data inconsistency.

04

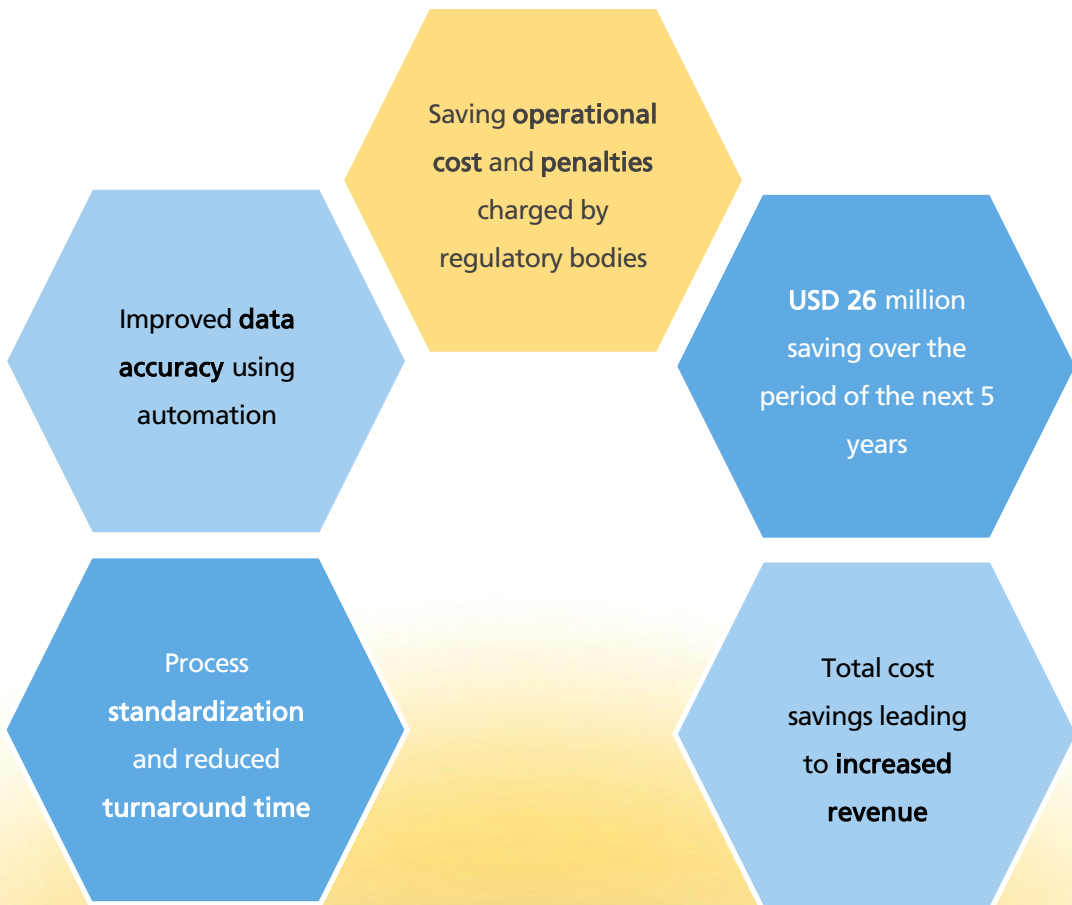

03

Giving users the whole and accurate information of the well
