

LTIMindtree

“LTIMindtree’s impressive expansion in SAP operations in the U.S. with a growing portfolio of services and solutions have helped the company deliver large and complex SAP S/4HANA transformation for large clients in the country.”

Tarun Vaid

Overview

LTIMindtree is headquartered in Mumbai, India. It has more than 83,500 employees across 116 offices in 36 countries. In FY23 the company generated \$4.1 billion in revenue, with BFSI as its largest segment. It offers SAP S/4HANA transformation, including advisory, implementation and support. The company offers RISE with SAP, digitize the core, industry cloud and value chain solutions focused on S/4HANA-enabled transformation. It has nearly 10,000 SAP practitioners globally to support over 220 clients, with manufacturing and consumer packaged goods as its largest industry verticals.

Strengths

Robust advisory capabilities: LTIMindtree has a strong consulting-led approach that starts with a comprehensive assessment of SAP estate using automated knowledge extraction using its proprietary Canvas Profiler tool. Its Reimagination Studio platform provides detailed impact analysis of S/4HANA-enabled digital transformation and value analysis across core business functions. Its recommendations for S/4HANA deployment and roadmap on cloud adoption make it a comprehensive advisory service.

Accelerating digital transformation:

LTIMindtree’s Reimagination Studio platform orchestrates favorable business outcomes and provides a logical path for digital transformation. The platform comprises SAP S/4HANA best practices, business

process maps, process KPIs and persona maps to accelerate digital transformation initiatives. It delivers industry-specific intricacies that provide amplified outcomes for intelligent enterprises.

Dedicated GenAI efforts: GenAI is a strategic investment focus for LTIMindtree to deliver modern SAP services for elevating user experience and co-creating GenAI-based solutions using SAP BTP and Business AI. It has established a dedicated competency for building GenAI with over 200 trained practitioners and 100 functional use cases across the supply chain and finance, HR and marketing functions.

Caution

For clients seeking SAP operations and transformation, LTIMindtree must emphasize its strong consulting-led approach, share thought leadership and market documents highlighting GenAI use cases and SAP Business AI capabilities.
