# Protect Enterprise Data with LTIMindtree's Backup Modernization with Cohesity

In the digital age, data has emerged as the backbone of modern enterprises, fueling strategic decision-making, innovation, and competitive advantage. With the exponential growth of data from social media, IoT devices, and online transactions, organizations are recognizing its transformative power. The dependence, however, has made them susceptible to ransomware attacks. To combat growing threats and risks, organizations seek comprehensive data protection strategies and solutions that boost cyber resilience.

## Trends in cyber threats

Modern ransomware and cyber threats have evolved into highly sophisticated and insidious entities, posing grave risks to enterprises worldwide. These malicious actors employ advanced techniques and strategies to infiltrate networks, exploit vulnerabilities, and encrypt critical data, rendering it inaccessible to its rightful owners. The increasing number of attackers targeting backup systems, the crucial lifelines for organizations seeking to recover from ransomware attacks, is particularly alarming.

With the rise in cyber-attacks and threats, organizations are forced to rethink their data protection strategies.

# LTIMindree's Backup Modernization powered by Cohesity

Backup Modernization offers a comprehensive suite of data protection solutions and services, enhancing enterprise cyber resilience. It modernizes backup, simplifies data protection, detects hidden threats, and enables rapid recovery from ransomware attacks. This unique blend of LTIMindtree's innovation and Cohesity's AI-powered platform delivers secure, high-performance, software-defined data protection solutions. With LTIMindtree Backup Modernization, confidently safeguard assets, ensure compliance, and stay ahead of evolving cyber risks while optimizing data management. Powered by Cohesity and delivered as a service by LTIMindtree, it enhances ransomware resilience and simplifies data management across environments.

## What the platform offers

01

### Backup Transformation

Reduce data recovery time from hours to minutes with fully hydrated snapshots, continuous data protection (CDP), and flexibility to exceed SLAs with Cohesity DataProtect—a comprehensive backup and data recovery solution for cloud-native SaaS and on-prem data at scale.

02

### AI-powered threat detection

Safeguard and recover against ransomware threats with Cohesity DataHawk, utilizing threat protection, cyber vaulting, and AI-powered data classification. Identify threats, assess attack impact, and confidently recover critical data.

03

### Cyber Vaulting for enhanced resilience

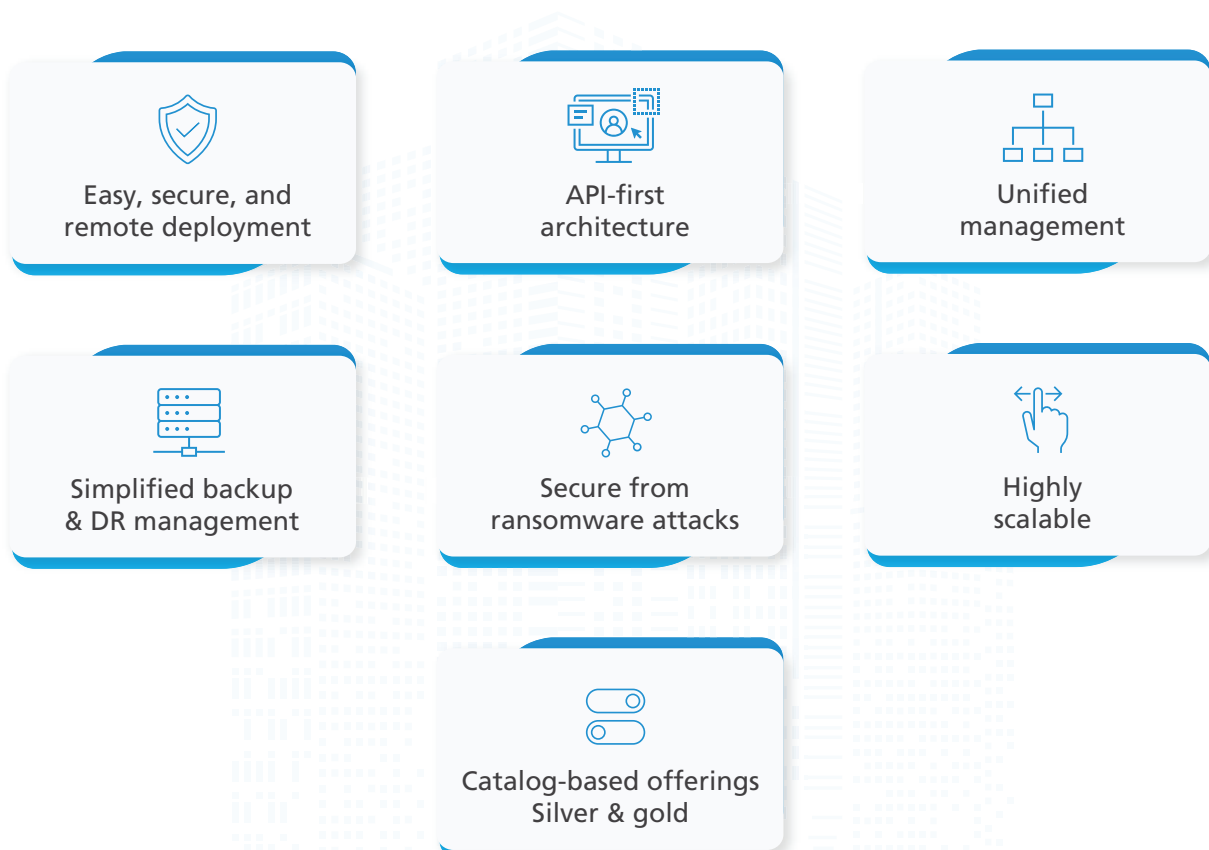

Strengthen cyber resiliency with Cohesity FortKnox, a SaaS data isolation and recovery solution. Take action with an immutable copy of data in a Cohesity-managed cloud vault. FortKnox enhances protection against ransomware and cybersecurity threats, simplifies operations, and reduces costs, ensuring organizations are confidently prepared for recovery from attacks.

# Driving Transformation with LTIMindtree's Backup Modernization

Backup Modernization encompasses a comprehensive strategy with a well-defined process that helps enterprises identify gaps and make well-informed decisions about cyber protection. LTIMindtree's large pool of trained experts collaborate with organizations as they perform the following key engagement steps:

- **Assessing** the client's infrastructure to understand app dependencies and requirement gathering
- **Planning** a comprehensive solution that integrates with the client's existing infrastructure and designing a project plan for implementation
- **Implementing** the solution incorporating modern best practices and testing the same thoroughly before production rollout
- **Migrate/Rollout:** Integrate the solution with tools after implementation, migrate backups to the new solution, and provide shadow support for the operations team
- **Managed Services:** Provide end to end managed services for implemented solution

## Solution highlights

## Benefits

- 

Simplified operations across hybrid and multi-cloud
- 

Global visibility and control for improved cyber resilience
- 

Lower risk of crippling ransomware attacks
- 

Strong security posture
- 

Minimum business disruption
- 

Reduce downtime and meet recovery SLAs

Safeguard critical data and ensure business continuity in the face of cyber threats with LTIMindtree's Backup Modernization, powered by Cohesity. For more information, contact us at [info@ltimindtree.com](mailto:info@ltimindtree.com).

## About LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 81,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
