Services Catalog

Exhaustive Quality Assurance services catalogue that can be selected by banks based on their program needs

T-LEAP	FUNCTIONAL QA SERVICES	AUTOMATION QA	DATA QA	PERFORMANCE & SECURITYQA	TEST ENVIRONMENT QA	SUPPORT STRUCTURE
Current State Analysis	QA Strategy	Automation Strategy	Data Warehouse Testing	Resilience Testing	Service Virtualization	QA CoE
Customized Improvement Plan	QA Plan	In-Sprint Automation	Data Profiling	Load, Scalability & Endurance Test	Environment Planning and Provisioning	Pilot / PoC
QA Roadmap Creation	Test Case Design	DevOps Orchestration	Tech & Financial - Data Recons	Infrastructure Security	Environment Maintenance	Tool Recommendation
Governance & Metrics	QA Execution	Tool - Selenium Based Auto.	Data Privacy/ Masking	Application Security		Innovation Labs
Process, Standards	QA Reporting	Tool - BOT Based Auto.	Test Data Management	DR Testing		
Agile Adoption		Tool - Recon Engine		Performance Engineering		

TRUST Services Summary

T-LEAP Advisory Services

A tailored methodology to identify gaps in QA activities and set up the road map for banks who have adopted Temenos as the Core banking platform. This will help a bank to take a Leap forward in their testing activities

Core Banking BAU Assurance Services

We also perform QA activities like SIT and UAT testing for any enhancement of Core banking BAU features.

Greenfield Implementation

A tailored service offering to support the SIT & UAT needs of the bank. We do this in an optimized fashion leveraging accelerators and specific services based on the project type. We come with test case inventory for each product for SIT testing. We also do baseline of performance for new implementation.

Temenos Interfaces App Testing

We facilitate testing of bank specific or temenos provided interfacing app testing like Channels, Infinity using rapid automation framework (T-RAFT) which is our inhouse solution. It speeds up the test execution and helps in getting early detection of defects. It also supports cross browser testing.

Temenos Upgrades

For upgrade projects we perform Parameter Testing, Sanity Testing System Testing, System Integration Testing, Regression, Automation, Performance Testing, Security Testing and User Acceptance Testing. We also leverage our inhouse test case repository JukeBox across temenos products to do so. We use robust process to verify & validate the movement of Legacy Data to the new Temenos & periphery application stack.

Resiliency Testing

Our inhouse Canvas Resilience Testing tool plays a crucial role in helping organisation to build robust and reliable systems that can withstand disruption and maintain uninterrupted service delivery in the face of adversity. By proactively testing and improving the system's resilience, organizations can minimize downtime, protect data integrity, and maintain customer trust and satisfaction.

Temenos Data Migration

For testing Migrated application, we majorly focus on data reconciliation with help of data templates and automated tools which compares source and target data, identifying discrepancies, and help to resolve them. This suite of solutions is designed to ensure data consistency, data integrity, accuracy, and compatibility with new systems.

Vulnerability Testing

Vulnerability testing service assesses systems, networks, and applications for security weaknesses and potential threats. It identifies vulnerabilities such as software flaws, misconfigurations, and weak authentication mechanisms. The service provides actionable recommendations to mitigate risks and enhance cybersecurity posture.

Best Accelerators for each QA Services Offerings

Jukebox

Reusable test case repository for Model Bank functionalities

Processes and Standards

- Standardized process for QA
- JIRA Setups
- Quality Gates
- QA T-Metrics (RQI)
- T-SURE

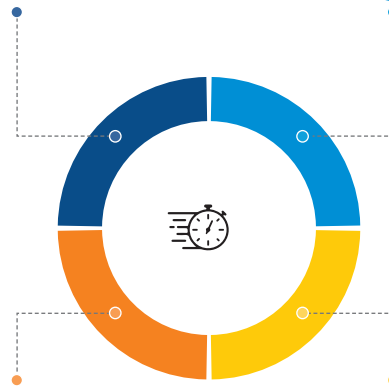

Test Automation Suite

- T-RAFT, automation framework for UI, API, OFS automation
- Temenos specific reusable libraries
- TDM tool to create synthetic data
- SCHAUT to schedule execution by monitoring CoB

Non Functional Testing

- Performance Testing – T-Perfect, CoB Analyzer. T-COM and T-DaRe
- Resilience Testing (Chaos engineering)
- Security Testing (Pen Test, SAST, DAST)

T-RAFT

Temenos Rapid Automation Framework for Testing - A unified "All In One" framework that will help to develop accelerated automation regression packs for Temenos and its interfacing components. Hybrid test automation solution for GUI, API, OFS layer automation.

Benefits

- Easy to install, script & maintain, Saves 40% of efforts compared to manual testing.
- Reduces regression execution span by 40%, OFS execution is 10 times faster than UI Automation execution.

Jukebox

It is repository of test cases bifurcated as product, stream, application and functionality. It is a framework with 8000+ test cases repository providing the coverage of all temenos application based on model bank. These test cases are segregated using product, stream, application, and functionality.

Benefits

- 30% Productivity gain achieved for test case creation for SIT.
- Serves as a base on which bank specific tailoring test cases needs to be appended.
- Assist in short learning curve for new QA teams being setup.

T-PERFECT

In house solution that helps on improving Temenos application stack resiliency, performance, security. This will help to identify performance NFRs, reuse scripts, figure out bottlenecks, deep dive analysis of COB jobs to improve its performance in short span of time.

Benefits

- Saves 60% of the COB analysis time.
- Ensures accuracy by automated analysis, reducing the human errors.
- Leverages the strength of Microsoft Power BI.

T-SURE

Temenos Syncordis Upgrade and Refactoring Enablement – It is QA approach to do testing for banks who have embarked on an Upgrade journey be it Infra, OS, DB or Temenos App upgrade. This approach will ensure nothing fails post the building block is retrofitted.

Benefits

- Explicit reporting on all difference in column names and its value
- Runs as multi-threaded service
- Highly parametrized to select specific comparisons
- Up to 90% reduction in manual efforts
