Our Services Offering Overview

Our Services Summary

Temenos Product Implementation

With our experience across decades, we have mastered the art of implementing Temenos product suite. Let it be Retail or Wealth banking, we have helped financial institutes/banks to adopt Transact-T24, Wealth –TAP, Payment Hub (TPH), Temenos Data Hub & Digital channels like Infinity. We are oen of the global partner of Temenos who have expertise and expertise across entire Temenos product suite.

Upgrade

As a Managed Certified Upgrade Partner, we have simplified the upgrade process, ensuring it is cost-effective, efficient, and non-disruptive. Our Upgrade Studio has 30+ certified experts and accelerator tools that reduce manual effort by 40% and provide flexibility to execute upgrade projects 100% offshore. You will also benefit from end-to-end automated testing and proper performance tuning.

- T-Discovery: Assessment
- T-Conversion: TAFC to TAFJ code conversion
- T-Componentization: Automate Componentization
- T-Dlimify: Auto delimiter conversion (TAFC to TAFJ)
- T-Com: Pre and post upgrade disparities comparison

Migration

Data migration is a critical phase to ensure legacy data is accurately and completely migrated to the Temenos application stack getting deployed. Our data migration methodology includes all critical phases, such as extraction, transformation, loading, and reconciliation. We also offer jBASE to industry standard database migration. This helps for a seamless cutover from legacy to the new Temenos world.

- Temenos DM Tool
- Automated Recon Tool
- Reconciliation Reports
- Temenos Data Mapping Sheets
- Temenos Data Extraction Sheets

Testing - TRUST

"**TR**ansformational **U**nit for Software **T**esting" is our center of excellence (CoE) of quality assurance services. This CoE includes functional validations (SIT & UAT), Temenos upgrade & data migration verification. We even support banks to develop automated regression suite and carry out non-performance testing like load & stress test, security & DR tests.
